## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, drawn to an agglomerate tile structure fabricated of intermixed materials, classified in class 501, subclass 1.
- II. Claims 8-11, drawn to an agglomerate tile structure fabricated of at least an outer layer bonded to a second layer, classified in class 428, subclass 357.
- III. Claims 12-16, drawn to a tile structure for use in a barrier between a circulation plenum within of a living space, classified in class 428, subclass 172.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions Groups I-III are not disclosed as capable of use together and are each drawn to a different embodiment as disclosed in Applicant's Specification. The different inventions are Group I, claims 1-7 which are directed to a tile structure having a composition of a binder material, a phase change material and a granular base medium; Group II, claims 8-11 which are directed to a tile structure of layered material wherein the second layer has a binder material and a phase change material but is absent a granular base medium and also has an outer layer; and Group III, claims 12-16 which are directed to a tile structure having a base support made of a single layer having a plurality of

Art Unit: 1772

fin protrusions including a binder material and phase change material but doesn't include a granular base medium. Therefore, Inventions I-III are unrelated.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

A telephone call was made to Jean Macheledt on 8/20/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1772

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine Simone whose telephone number is (571) 272-1501. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on (571) 272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
